

## PORTY Premium Plus

Article Number: 4954

The proven Party Premium 1200AS/RC was further enhanced and now has one more button to make the user's (photographic) life easier. This button is the key to using the revised radio remote control system. The new Party Premium Plus with an integrated radio receiver offers not only the possibility of radio-controlled triggering but also provides the option of power adjustment in 1/10 f-stop increments. Even the modeling light can be switched on and off remotely. The channel can be selected easily by using the RC/CH button on the operator panel. In total, there are 3 different channels available on the device. On the receiver, the channel is selected by means of a sliding switch on the side. There, you can also select an additional all-channel function, by means of which several devices can be controlled simultaneously. Shortest sync times of cameras can be used without restriction. Thanks to the transmitter's low 6 V voltage, this system offers unquestionably the safest mode of operation, particularly in conjunction with digital cameras. It can connect either to the camera's direct X-contact or, using the sync cable provided, to the camera's sync socket. The Party's radio antenna is now screwed on and can be removed or replaced easily by the user, if needed. Another advantage of this technology: When working over great distances, a special longer antenna with considerably increased sensitivity (accessory) can be used. In response to the wishes of many of our customers, the previous sync socket was replaced by a standard sync socket with a diameter of 6.3 mm. Thus all standard sync cables can be connected. The socket is protected against water drops by means of a seal plug.

### Data sheet

Stored energy:	1200 J
Aperture at 100 ASA 2 m distance:	f 64,2 **
Flash Sequence in sec. (230 V) Normal Recycling, 100 %:	2,7 s
Flash sequence in sec. (230 V) normal recycling, min. energy:	0,4 s
Output adjustment in 1/10 f-stops:	6 f
Output distribution:	asymmetrical

Flash outlets/number:	2
Weight in kg:	8,95
Dimensions in cm	
L x W x H:	21 x 12,4 x 32,1
